

PRESS RELEASE

FOR IMMEDIATE RELEASE

Part #: 7848

Description: Lifted Jeep Cherokee Front Sway Bar

MSRP: \$465.00

Application: 84-01 Jeep Cherokee XJ 4x4 with a 3-5" Lift

Hellwig Products released their new front sway bar for the Jeep Cherokee XJ. While they currently sell another front sway bar for lifted vehicles, that kit included quick disconnecting end links for the extreme rock crawler. This new kit replaces the quick disconnecting end links with our heavy duty, adjustable end links to create a less expensive option for customers who may have a lifted vehicle but rarely go rock crawling where they would need the additional flex. It fits both the 2 and 4 door models. The Jeep Cherokee, like many SUVs, has a fair amount of body roll even from the factory and once it is lifted it only gets worse. This sway bar increases the rate of the suspension for less body roll, better handling and improved safety. It can be used on vehicles driven daily as commuters or loaded up with equipment or trailers for weekend adventures. It is manufactured from 1-1/8" solid, heat treated chromoly steel and all the steel parts come with a lifetime warranty. The 3 hole, forged ends allow the driver to pick between 3 different sway bar rates to match their driving style or the weight of their specific vehicle.

See the chart below for all of Hellwig's Jeep Cherokee XJ products.

Product Attributes:

Powdercoated Steel Components

Polyurethane Bushings

3 Hole Adjustment for Rate Tuning

Adjustable Length End Links

Heat Treated, 1-1/8" Chromoly Steel
